

NEXSTAY

The Operating System for India's PG Industry

Founder: Shikhar Agnihotri

Problem

India's Paying Guest (PG) industry serves over **20 million students and working professionals**, yet most properties are still managed using WhatsApp, Excel sheets, paper records, and manual follow-ups.

This leads to:

- Missed rent collections
- Poor occupancy management
- Lost tenant records
- Manual complaint handling
- No business insights
- Lack of transparency for tenants

For tenants, finding a trustworthy PG remains equally difficult due to fragmented listings, hidden charges, and limited visibility into amenities and policies.

Solution

NEXSTAY is an AI-powered operating system built for PG accommodations.

Instead of using multiple disconnected tools, PG owners can manage their entire business from one platform.

NEXSTAY combines:

- PG Management ERP
- Tenant Super App
- PG Marketplace

into one connected ecosystem.

Owners manage operations.

Tenants manage their stay.

Both operate on the same platform.

Why Now?

India's rental housing market is rapidly formalizing.

- Increasing migration to Tier-1 & Tier-2 cities
- Growing student population
- Rising demand for organized co-living
- Rapid digital adoption among SMBs
- UPI-driven digital payments

Despite these trends, PG management software adoption remains extremely low, creating a significant opportunity for a category-defining platform.

Market Opportunity

TAM (Total Addressable Market)

India's student housing and PG market is estimated at **₹50,000+ crore**, serving over **2 crore residents**.

SAM (Serviceable Available Market)

Over **100,000+ professionally managed PGs** across India's major cities.

SOM (Serviceable Obtainable Market)

Capturing just **1%** of the organized PG market (~1,000 PGs) creates a multi-crore recurring SaaS business.

Product

NEXSTAY enables owners to manage every aspect of their business.

Owner Platform

- Room & occupancy management
- Rent collection

- Expense tracking
- Complaint management
- Employee management
- Invoice generation
- AI profit analytics
- Multi-property dashboard

Tenant App

- Rent payments
- Digital invoices
- Complaint tracking
- Notices & announcements
- Agreements
- Stay management

Marketplace

- Discover verified PGs
- AI recommendations
- Roommate compatibility
- Transparent pricing
- Direct booking enquiries

What Makes Us Different

Existing products act like digital registers.

NEXSTAY acts like an operating system.

Traditional Software	NEXSTAY
Manual management	AI-assisted operations
Separate tenant tools	Unified ecosystem
Limited reporting	Profit & occupancy analytics
No discovery platform	Integrated marketplace
Basic billing	Complete business operating system

Business Model

Recurring SaaS subscription based on number of beds managed.

Pricing

Starter

Up to 50 beds

₹4,999/month

Growth

Up to 100 beds

₹8,999/month

Enterprise

100+ beds

Custom Pricing

Additional revenue streams:

- Setup & onboarding fees
- Marketplace promotions
- Premium AI tools
- Financial services (future)

Go-To-Market

Phase 1

Launch across Delhi NCR, Noida, Lucknow and Kanpur.

Customer acquisition through:

- Direct founder-led sales
- PG associations
- Local field partnerships
- Referral program
- Content marketing
- AI-powered outbound outreach

Traction

Current Stage

- Market research completed
- User interviews conducted
- Complete user journeys designed
- MVP wireframes completed
- Product architecture finalized
- Development in progress

Vision

Today, we're building software for PG management.

Tomorrow, we're building the infrastructure layer for India's rental housing ecosystem.

Future roadmap:

- AI-powered operations
 - PG booking marketplace
 - Digital rental agreements
 - Smart access systems
 - Embedded finance
 - Tenant credit profiles
-

Financial Projection

100 PG customers

≈ ₹60 Lakhs ARR

500 PG customers

≈ ₹3 Crore ARR

1,000 PG customers

≈ ₹6 Crore ARR

Additional upside comes from onboarding fees, marketplace monetization, and financial services.

Funding Ask

Seeking ₹10 Lakhs in seed funding to accelerate MVP development and early customer acquisition.

Use of funds:

40% Product Development

30% Sales & Marketing

20% Hiring

10% Operations

Closing

NEXSTAY is building the operating system for India's fragmented PG industry—bringing owners, tenants, and property discovery onto a single AI-powered platform.
